

Supplemental Fig. Internalisation of GPR109A and GPR109B stably expressed in HEK-293 cells.

a, HEK-293 cells stably expressing GPR109B-EGFP were stimulated with indicated concentrations of agonists for 1h. b, ELISA measurement of GPR109A and GPR109B remaining on the cell surface after treatment of cells with indicated concentrations of niacin for 1h. c, ELISA measurement of GPR109B remaining on the cell surface after treatment of cells with indicated concentrations of IBC for 1h.
